

IAQ Options

PM2.5 90% Filter

- Anti-microbial treated media
- High dust-holding capacity
- Low depth and lightweight
- Efficiency PM2.5 90%

Indoor PM concentration measurement data after using PM2.5 filter

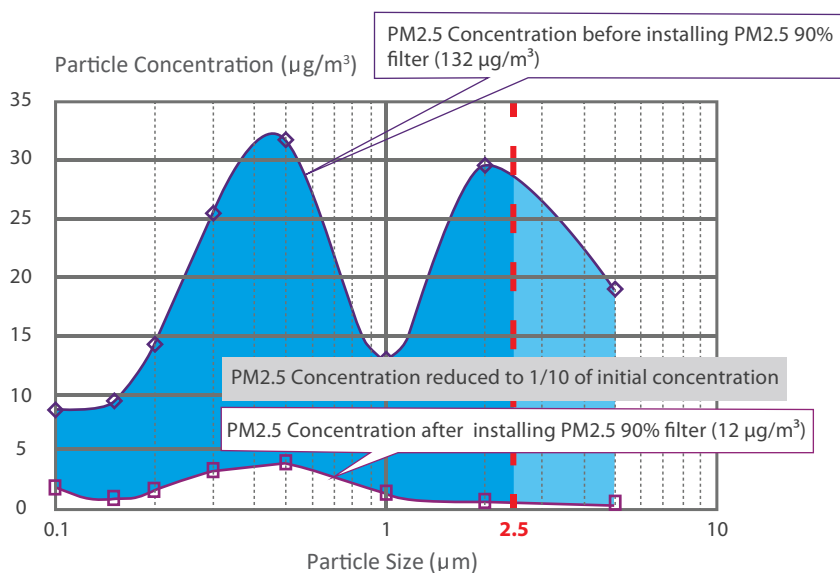

- The highest mass of particles in the air comes from particles in the range of 100nm – 2,5µm (PM1 - PM2.5).
- The lighter and smaller a particle is, the longer it stays in the air
- Prolonged exposure causes a constant inflammatory state and may also work as carriers of viruses.

Applicable Models:
FWW-C/F/DA

Power Supply:
220-240V/1Ph/50Hz & 60 Hz

Note: There will be an increase in air pressure drop. Please contact your local Daikin representative for product selection.

After installing the PM2.5 filter, average concentration of PM2.5 particles reduced to 1/10th
